AM312 PIR

DETECT | PICO BLOCKS | MOTION | MINI PIR

What does it do?

An **AM312** is a tiny PIR sensor that notices warm bodies moving nearby.

PIR means passive infrared. Its faceted lens divides the view into zones, so a person or animal moving between them makes the output switch on.

The complete AM312 module runs from 3V3 and uses very little power. Its sensitivity and roughly two-second output pulse are fixed.

Uses

Wardrobe light

DETECT Movement in the wardrobe → **DECIDE** Is someone reaching in? → **DO** Turn on the light

Dragon treasure alarm

DETECT Movement near the hoard → **DECIDE** Is someone sneaking closer? → **DO** Make the dragon roar

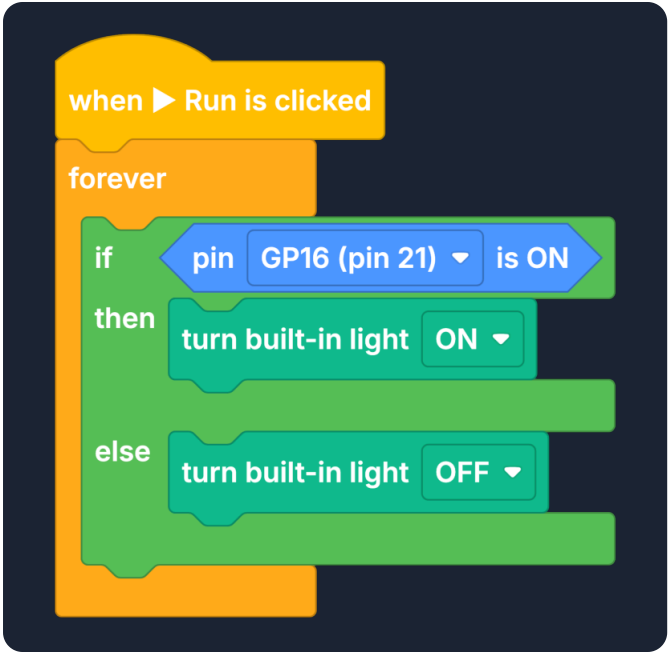

Lens	VCC	OUT	GND
Splits the view into zones	Power from 3V3	High on movement	Ground

Raspberry Pi Foundation

Blocks

MicroLab

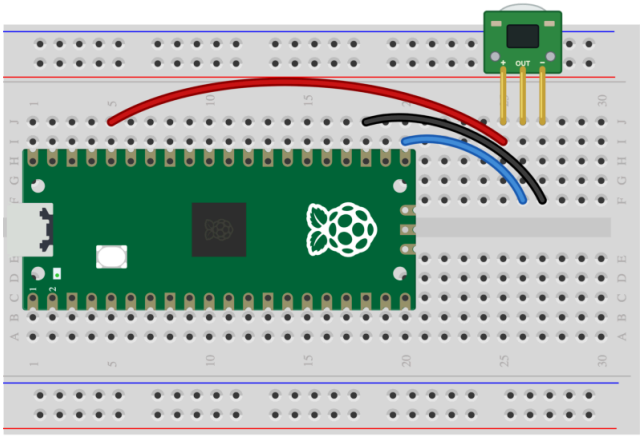

getmicrolab.com

The Pico's light comes on when something warm moves nearby. After power-up, give the sensor a minute to settle.

Wiring

PICO

VCC → 3V3 OUT (pin 36); **OUT** → GP16 (pin 21); **GND** → GND (pin 23).
