LED

DO | PICO BLOCKS | LIGHT

What does it do?

An LED is a tiny light that your code can switch on, switch off, or blink.

LED stands for light-emitting diode. It glows when electricity flows the right way through it, so the long leg and the short leg matter.

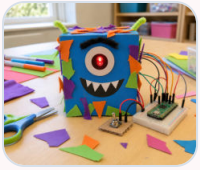

Your projects can use LEDs to show a warning, celebrate something, or tell people what is happening.

Uses

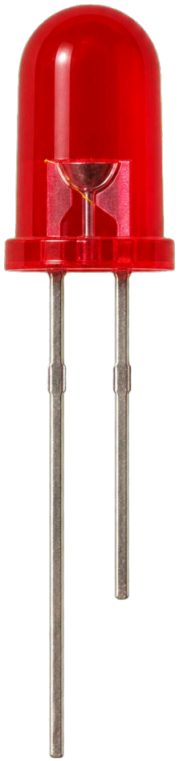

Car brake light

DETECT: Brake control signal → DECIDE: Is braking requested? → DO: Light the red LEDs

One-eyed monster box

DETECT: Box lid is opened → DECIDE: Is guard mode armed? → DO: Glow the monster eye

Anode
Long leg, to GPIO

Cathode
Short leg, to GND

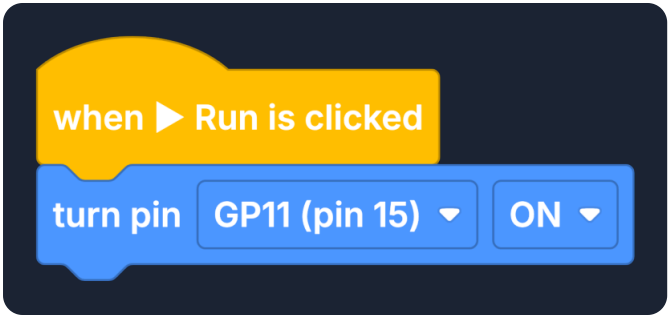

Lens
Glows here

Raspberry Pi Foundation

Blocks

MicroLab

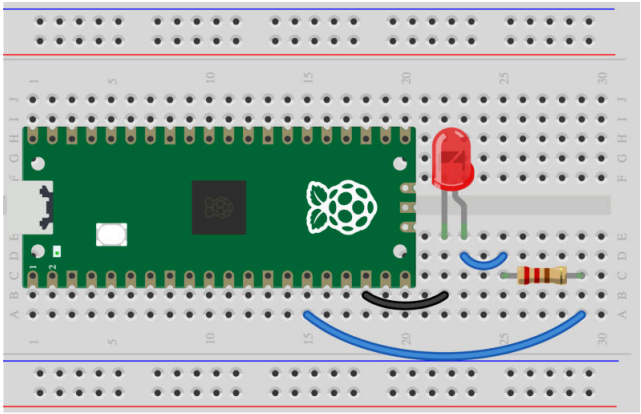

getmicrolab.com

Change ON to OFF to switch the LED off again.

Wiring

PICO

GP11 (pin 15) → 220 Ω → LED → **GND** (pin 18)
